SUMMARY

Student who ships, 6+ hackathons, 8+ deployed apps, and a track record of building full-stack systems that real users actually use spanning MERN, GenAI, Blockchain, and 3D web. National-level hackathon winner with strong JavaScript, React, and Node.js fundamentals. Comfortable across the stack from AES-encrypted APIs and WebSocket real-time engines to Solidity smart contracts and Three.js 3D scenes. Currently levelling up in DevOps, System Design, and React Native mobile development.

SKILLS

Languages: C++, JavaScript (ES6+), Python

Frontend/Mobile: React, React Native (learning), Three.js/WebGL, TypeScript, Vite, Tailwind CSS

Backend & APIs: Node.js, Express.js, Socket.io, REST APIs, Redis, JWT Auth, System Design

GenAI & AI: LLM API Integration (OpenAI / Gemini), Prompt Engineering, AI-powered app development

Database/Cloud: MongoDB, PostgreSQL, Firebase, Supabase, AWS S3

DevOps: Docker, Kubernetes, GitHub Actions CI/CD, Vercel, Render, Postman

Blockchain & Web3: Ethereum, Solidity, Hardhat, Web3.js, MetaMask, Smart Contracts

PROJECTS

Aarunya.in – 3D Interactive College Fest Website *2025*

- Built MITS Gwalior's annual fest site with Three.js + React; immersive 3D scenes, particle effects, and animated event showcases
- Optimised WebGL render pipeline for smooth 60fps across devices; custom domain deployment on Vercel

TrackMate – Decentralised Civic Safety Platform *HackSagon 2026 Finalist*

SIH (Travel & Tourism track) — 4-role system: Tourist, Resident, Business, Authority

- React + Socket.IO dashboard with sub-50ms geofencing; offline-first Ghost Queue SOS via ServiceWorkers; Flutter app for all 4 roles
- AI Risk Pulse (Gemini Analytics) predicts danger hotspots 60+ min ahead; Solidity smart contracts for tamper-proof E-FIR logging

MITs Smart ID Card Management System *2025*

Full-stack hostel platform: gate access, attendance, library, elections & admin reporting via AES-256 encrypted QR cards

- Node.js/Express API + React 19 dashboard + Flutter/React Native mobile scanner; real-time Socket.io live feed to admin dashboard
- RBAC (SUPER_ADMIN → Security Guard), JWT + Redis token blacklisting, GPS geofence attendance, Docker + CI/CD pipeline

CRX – Carbon Credit Exchange *HackSagon 2025 Finalist, IIIT Gwalior*

- Decentralised carbon credit trading platform with Ethereum smart contracts, Hardhat, and MetaMask wallet integration

ReconnectHub – Alumni Platform *Winner, Code Coalescence*

- MERN alumni network with JWT auth, role-based access, and real-time notifications — won national-level hackathon

AJDraw – Real-Time Collaborative Drawing App

- WebSocket-based collaborative canvas with live multi-user sync; event-driven Node.js backend

LEADERSHIP & EDUCATION

Technical Co-Head – AI Club, MITS *2024–Present*

Technical Member – GFG Student Chapter, MITS *2024–Present*

MITs Gwalior – B.Tech IT (AI & Robotics) *2024–2028*

ACHIEVEMENTS

Winner – Code Coalescence Hackathon | Finalist – HackSagon 2025 & 2026 (IIIT Gwalior) | Built & deployed 8+ full-stack apps
